## PROFESSIONAL SUMMARY

Motivated Computer Science undergraduate (B.Tech, 2026) with hands-on experience in full-stack web development and enterprise application development. Proficient in JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, and PostgreSQL. Currently working as a Software Developer Intern, contributing to production-grade internal tools and employee engagement platforms. Adept at building RESTful APIs, integrating third-party services, and delivering scalable, maintainable code. Seeking a full-time Software Development Engineer (SDE) role to apply technical expertise and contribute to impactful products.

## TECHNICAL SKILLS

|                          |                                                                                    |
|--------------------------|------------------------------------------------------------------------------------|
| <b>Languages</b>         | Java, JavaScript (ES6+), HTML5, CSS3, SQL                                          |
| <b>Frameworks</b>        | React.js, Next.js, Node.js, Express.js, Tailwind CSS                               |
| <b>Databases</b>         | PostgreSQL, MySQL, MongoDB, Prisma ORM                                             |
| <b>Cloud &amp; Tools</b> | Git, GitHub, VS Code, Microsoft Power Apps, Power Automate, SharePoint             |
| <b>Integrations</b>      | Zoho API, Socket.io, JWT, SSO, Zod, REST APIs                                      |
| <b>Concepts</b>          | Object-Oriented Programming (OOP), Data Structures & Algorithms, Agile Methodology |

## WORK EXPERIENCE

**Software Developer Intern** | Penthara Technologies – Mohali, Punjab *January 2026 – Present*

- Engineered Acknowlix, a production-grade internal employee engagement and rewards platform (similar to Bonusly) using Next.js, Node.js, PostgreSQL, and TypeScript, enabling peer-to-peer recognition and point-based reward allocation.
- Developed a PM Request Application using Microsoft Power Apps, Power Automate, and SharePoint to automate job creation, project assignment, and approval workflows, reducing manual coordination effort significantly.
- Integrated Zoho API to automate daily timesheet tracking, enabling real-time project and task management for the development team.
- Diagnosed and resolved critical workflow failures in Power Automate pipelines, restoring automation reliability and improving cross-team adoption.

## PROJECTS

**Acknowlix – Employee Engagement Platform** | *Next.js, Express.js, PostgreSQL, TypeScript, Prisma ORM, Zod, JWT, SSO*

- Architected and developed a full-stack employee engagement platform enabling employees to recognize peers, award points, and redeem rewards — modelled after industry tools like Bonusly.
- Implemented Single Sign-On (SSO) with JWT-based authentication, ensuring secure and seamless organizational access without repeated logins.
- Enforced end-to-end type safety using TypeScript and Zod schema validation; leveraged Prisma ORM for structured, type-safe interactions with a PostgreSQL database.

**ChatUp – Real-Time Chat Application** | *React.js, Tailwind CSS, Express.js, Socket.io, MongoDB*

- Built a full-stack real-time chat application with support for text and image messaging, live online-user tracking, and persistent chat history using MongoDB.
- Achieved 40% faster message delivery and 35% improvement in real-time reliability by optimizing WebSocket event handling with Socket.io.
- Improved user retention by 20% through a responsive, mobile-friendly UI built with React.js and Tailwind CSS, ensuring a seamless cross-device experience.
